

January 21, 2009

ConocoPhillips Company's Specialty Solvents products including Isopentane, Normal Pentane, Hexane(S), Commercial Heptane and Low Aromatic Commercial Heptane (LACH) are hydrocarbon or hydrocarbon mixtures derived from petroleum crude oil feed stock. ConocoPhillips does not use any animal or plant derived additive substances or chemicals in the manufacture of these products. Further, no animal or plant derived substances are processed at anytime in the production equipment used for the manufacture of these products. Specialty Solvents has established good manufacturing practices to assure that product quality is maintained during manufacture and distribution.

ConocoPhillips is confident that our Specialty Solvents products should be eligible for Halal certification since it neither contains nor contacts animals or plant derived substances.

As you can see, we take pride in our products and take every precaution to insure that our customers receive the best product possible. If you have any questions please feel free to give me a call at 832.486.3339 or email me at marty.r.taber@ConocoPhillips.com .

Respectfully,

Marty R. Taber
